

MESTAR NAZIM

Fullstack Web Developer | Software Engineer

Jijel, Algeria | Open to Relocation | +213 674-48-50-43 | nazim.mestar@gmail.com | <https://www.nazimmestar.space> | <https://github.com/nazimmestar> | <https://www.linkedin.com/in/nazim-mestar-21021229b/>

SUMMARY

Master's graduate in Information Systems and Decision Support with strong foundations in full-stack web development and software engineering. Skilled in building web and desktop applications using React, TypeScript, Node.js, Express, Java, JavaFX, and MySQL. Experienced in cloud computing research, virtualization, and simulation using CloudSim Plus, with a focus on performance and energy-aware optimization. Additional background in graphic design with portfolio experience. Fluent in Arabic and French with B2 English certification.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Desktop: Java, JavaFX

Databases: MySQL, MongoDB

Languages: Java, JavaScript, Python

Cloud & Systems: Cloud Computing, CloudSim Plus, Virtualization, System Design

Concepts: OOP, UML, Software Engineering, Data Mining, Data Warehousing, Agile

Design: UI/UX Design, Figma, Graphic Design

Tools: Git, GitHub, VS Code, Postman

PROJECT EXPERIENCE

AI Resume Analyzer — Fullstack Web App

2025 – 2026

- Built a fullstack React + TypeScript web application that analyzes uploaded resumes and generates structured AI-powered feedback using Puter.js as a serverless backend
- Integrated Puter.js for LLM-based CV scanning, cloud file storage, and user authentication — eliminating the need for a custom backend
- Designed a responsive multi-step UI with file upload, AI analysis pipeline, and structured results display

Cloud VM Migration Optimization — Master's Research Project

2024 – 2025

- Simulated 5 threshold-based overload detection policies (Static, Dynamic, Double Dynamic, Static Double, and Hybrid) using CloudSim Plus v8.5.5 on 16 hosts, 64 VMs, and 200 cloudlets
- Compared host consolidation vs. no-consolidation strategies; Static Double and Hybrid threshold policies achieved the greatest reduction in energy consumption and active host count
- Evaluated 4 metrics per strategy — total energy (kWh), migration energy cost, migration count, and total migration time — against a no-migration baseline

Medical Clinic Management System — Desktop Application

2022 – 2023

- Developed a full-featured JavaFX desktop application for clinic administration, appointment scheduling, and patient record management
- Designed complete system architecture using UML diagrams (use cases, class, sequence), following software engineering best practices
- Integrated MySQL database with secure data access layer managing patients, doctor schedules, and billing

EDUCATION

Master's Degree — Information Systems and Decision Support

University of Jijel, Algeria | 2023 – 2025

Bachelor's Degree — Computer Science / Information Systems

University of Jijel, Algeria | 2020 – 2023

CERTIFICATIONS

- British Council English Test — B2 Level (Professional Working Proficiency)
- Web Development Certification — Udemy

LANGUAGES

- Arabic** — Native | **French** — Fluent | **English** — B2 Professional Working Level
